

Wednesday 13th January 2021: Design and Technology

Design and create your own robot out of junk and recyclable materials. Think about how you will join its different parts, how you will decorate it, and any special features you would like to give it. Make a sketch of it below first and annotate showing the different junk materials you will use and how you will join them. Ask an adult if they can take a photograph to send to our class email for you.

Design for my Robot made from junk and recyclable materials
