

## DT Task

Your task is to design and construct your own maze. Look at the examples below. What kind of materials could you use? Make sure your maze has an entrance and an exit. Will you have a centre like the maze where the minotaur lived? Can you include some dead ends? Make a sketch of your design before you start so that you have a plan to work to. When you have finished, check out your maze with something like a marble or a counter.
