

# Timeline of the world

Over the centuries there have been many different civilizations. We have all heard about the Romans, Vikings, and Ancient Greeks, but exactly how long ago did they exist?

When we look at timelines. We use the words BC and AD. The year 0 is in the middle of the timeline. Much line 0 is in the middle of a timeline when we look at negative numbers.

BC are all the years before 0.

AD are the years after 0.

Your task is to cut out the events on the activity page and place them in order.
