

# Fire Safety

Fire can be useful to us in many ways, from cooking food so that it is safe for us to eat, to dazzling firework displays. Despite this, we must make sure we treat it with respect, attention, and care.

If not treated with respect, fire can damage property or burn us. The best way to avoid this is by not letting a fire start in the first place. We can do this by:

- Make sure plug sockets are not overloaded.
- Ensure that there is nothing left out that we can trip over.
- Ensure that any fire is not left unattended.
- Keep items that burn away from the cooker.
- Never play with fire such as matches or lighters.
- Have a plan if a fire does start.

## Task 1)

Circle the hazards on the worksheet.

## Task 2)

Can you explain why these things could be hazards and explain what we could do instead for each hazard?

**Can you spot the hazards  
around the home?**
