

# Science Home Learning – Week 2

Have you ever thought about which teeth you use to eat different foods?

## Task 1)

Record what food you eat and explain which part of your mouth you use to eat it. Remember, you might use more than group of teeth to eat.

E.g.

I ate a carrot. Firstly, I used the front of my mouth. I then moved it to the back of my mouth before swallowing it.

## Task 2)

Draw a picture of the teeth that you used for each food and describe what you used it for.

E.g. I used this tooth to cut things like carrots to make them small enough to go to the back of my mouth.
