

My internet safety guide

This week, we are going to create a guide a guide to stay safe online.

You will need to talk about what you should do in certain scenarios when online.

Use what you learned about internet safety last week to help you. You can also ask adults at home about what you should do.

- Draw a picture of the scenario and explain what it is.
- Write what you should do.

Look at the example below to help you.

You find a game that you really like, but it costs £5 to buy. Your adult's credit card is saved on your device.

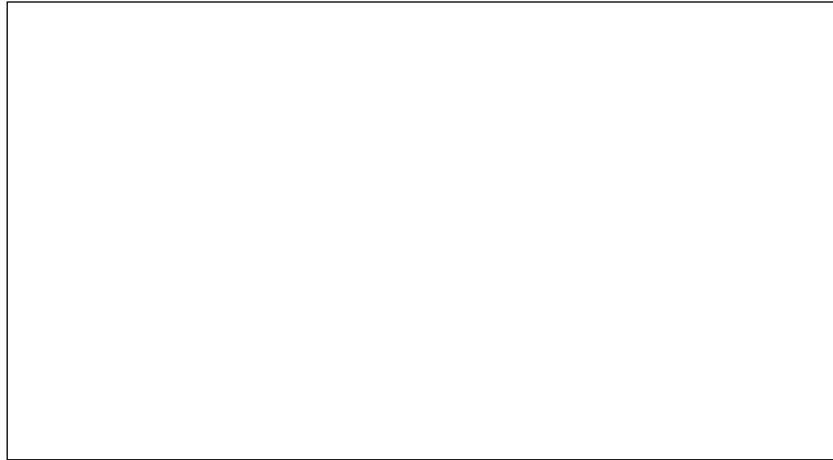

What should you do?

If something costs money, you should always ask an adult for permission before buying it. Even if their credit card is saved on your device. Remember to look out for the £ symbol, as this means money is involved. You should always check to see if the game is appropriate for your age and does not have features that let strangers talk to you.

After finishing the scenarios on the next sheet, can you think of some scenarios of your own, and explain what you should do?

Someone from school has send you some nasty messages on Roblox. What should you do?

You receive a text message from a stranger. What should you do?
