

# Which objects are like our teeth?

Look at the following bitesize lesson and recap what each tooth is for. You may remember when we wrote about which teeth we used when we ate certain foods.

<https://www.bbc.co.uk/bitesize/topics/z27kng8/articles/zsp76yc>

**Task 1) Find some objects around the house and use them to crush, chop or tear food. Think about which tooth these objects are like.**

**Task 2) Draw a picture of the object you used and what it did to the food. Remember to write about which tooth it is like.**

**Example: I used a round stone to crush a piece of apple. The stone was a bit like a molar because molars are used for crushing and grinding food.**
