Science  
Week  
2021

William Martin C of E  
Schools and Nursery

# INNOVATING THE FUTURE!

This year, the focus for British Science Week is '*innovation and working to create a better future for all.*' William Martin Schools will be celebrating Science week between **8<sup>th</sup>- 12<sup>th</sup> March 2021** and look forward to sharing the excitement and fun with all the children!

Through the week, we will be looking at the effects of climate change, human impact and flooding on the natural environment, working together to design and create our own flood resistant/ waterproof villages.

We will discuss the importance of sustainability and recycling materials to create our buildings and this is where we need your help!

*If you have any recyclable materials e.g plastic packaging, clean food/drinks packaging, bubblewrap, foil, cardboard etc, please place it in a bag and send it into school, with your child by **Monday 8<sup>th</sup> March**. We can then quarantine the items before using them later in the week.*

But the fun doesn't stop there!

We will also be having our annual at home, competition: **How far can you stretch a Curly Wurly?** We have renamed this 'The Hazel Challenge' in memory of Miss Hazel who was a much-loved teacher of the school and keen scientist. Competition rules and full details of how you can enter can be found on the Science page of the School's website.
